

The basis of a free market economy is competition. The NAB is trying to avoid this, and to save their profits by having the government put unfair restrictions onto satellite radio's broadcast rights. Please do not help line their pockets by allowing them to sway the government into passing NAB's petition 04-160. People choose their radio and local broadcasters need to realize they need to become more competitive if they are going to persuade people to listen locally rather than to satellite broadcasts. We as subscribers are willing to pay the fee to receive the services.
